Index 1977

SUBJECT

Analysis
  glc, 74
  isotope dilution, 13
Atmospheric photochemistry, 172

Books, conservation of, 133
Books
  A-level experiments, 22
  chemical education, 56, 119, 153
  chromatography, 56
  electrochemistry, 119, 150
  energy, 23, 89
  etymology, 56
  examinations, 120
  gas, 22
  general, 57, 88, 89, 120, 148, 150
  industrial chemistry, 154
  inorganic chemistry, 153, 185
  kinetics, 22
  laboratory manual, 186
  materials, 154
  Meadow Bank School, 23
  mercury, 185
  multiple choice, 23
  ONC, 23
  organic chemistry, 57, 120, 150, 153, 185
  pesticides, 184
  physical chemistry, 57, 88, 148, 153, 185
  physical science, 154
  practical work, 56
  radiation, 186
  reaction mechanisms, 22
  recycling, 148
  resources, 154
  safety, 154, 185, 186
  science education, 22, 148
  spectroscopy, 22, 120, 148
  stereochemistry, 150
  thermodynamics, 120, 121
  transition metals, 89, 153
  Wreake Valley Project, The

Catalysis, heterogeneous, historical, 14
Cell, zinc–air, 49
Chemical education, 108
  historical, 7, 76, 166
Chemical equilibrium, 169
Chemical shifts, conventions in nmr, 44
Chemistry
  bioinorganic, 71
  mathematics and, 117
  plants and medicine, 114, 140
Chlorine, detection of, 181
Chromatography, lipid analysis 74
Computer
  experiments, 42
  simulation, 172
Conservation of documents, 133
Copper, 71
  (II), experiments with, 145
Crossword, organic nomenclature, 82

Displays, computer assisted graphical, 42
Döbereiner, J. W., 14
Documents, conservation of, 133

Education
  Act, 1902, 166
  science and girls, 64
  through chemistry, 37, 38
Electrode, reversible hydrogen, 49
Electronic spectra, of transition metal complexes, 136
Elementary school code, 166
Energy profiles, misuse of, 87
Examinations, historical, 76
Experiments
  computer, 42
  copper(III), 145
  gel filtration, 48
  manganese(III), 146
  metal complexes, 145
  nickel(III), 145
  nitric acid from ammonia, 79
  oxidation states, 145, 146
  transition metal, 146

Ferrocene, discovery of, 110
Film reviews
  ammonia processes
  chemistry, 58
  engineering, 58
  chemical engineering, 58
  chromatography, 121
  CH_4/CD_4 and tritium, 58
  electrolytic conductivity, 58
  elad, 121
  oil
    offshore, 121
    recovery, 121
  pesticides, 58
  plastics
    fire hazards, 58
    properties, 121
  reaction dynamics, 58
  sodium fusion, 58
  sulphuric acid plant, 58
  thermoplastics, 121
Filtration, a column for gel, 48

Gossage, W., 46

Homogeneous oscillating reactions, 53

Industry, soap, historical, 46
Isomerism, and mathematics, 20
Isotope dilution analysis, 13

Johnstone, A. H., interview, 40

Laboratory
  learning aids, 51
  videotapes in, 84
Lambert-Beer, 174
Learning aids, laboratory, 51
Light absorption, 174
Lipid analysis by glc, 74

Manganese(III), experiments with, 146
Mathematics
  and chemistry, 117
  modern, 20, 117
Medicinal chemistry, and plants, 114, 140
Metal complexes, experiments, 145
Metallocenes, historical, 110
Model, molecular, for nitrogen inversion, 102
Mol^{-1}, need for, 17
Morphine, 115

Nickel(III), experiments with, 145
Nitric acid from ammonia, experiment, 79
Nitrogen inversion, model for, 102
Nmr, conventions and chemical shifts in, 44
Nuffield topic 10, 18

Plants and medicinal chemistry, 114, 140
Practical work, evaluation of objectives, 11

Rare earths, 9
Reaction, change of extent of, 17
Reactions, homogeneous oscillating, 53
Research, classroom based, 108
Reversible reactions, kinetic theory of, 182

Safety
  asbestos, 34, 122
  beryllium, 123
  books, 9
  dimethylamine perchlorate, 91
  labelling, 123
  methylfluorosulphate, 91
  phenol, 28
  radiation, 122
  sensitisation, 91
  silver oxide, ammoniacal, 122
  spectacles, 92
  storage, 28
  tlvs, 122
Spectra, of transition metal complexes, 136

Teaching, monitoring of, 108
Tetrahedral bond angle, 180
Time chart, 103
Transition metal complexes, colours of, 136
Trichloromethane-propanone, replacement of, 18

UTOPIA, 178

Videotapes, in chemistry laboratories, 84

AUTHOR

Adam, D. J., 46

Bailey, D., 114, 140
Barrett, J., 42
Batts, B., 182
Baudot, Ph., 79
